

CNN

COLD WAR

THE COMPLETE SERIES

1945-1991

HOW DOES THIS COMMITTEE WORK?

This one is a special committee. One thing that you should know before stepping in is that you shouldn't be afraid to talk as it is a very dynamic activity. First off, it is not like the other committees. As you might have already seen, the topic is very general and will be interrupted by sudden crisis. Therefore, you should dominate the history of the country you will be representing during this time. This is a complete time-travel!! From 1945 to 1991 the fate of the world will be in your hands!

WHAT DO I NEED TO KNOW AS A DELEGATE?

You will now be entering into a whole different world. You need to bear in mind that from now on you are the head of state of the country you will be representing instead of the country itself. Consequently, you really need to know that person's life and act as if you were him/her. Also, if as the time passes by there is a change in the government or "casualties", you need to be able to change your character. In conclusion, you really need to know the political changes during that period of time and be able to represent them.

RULES OF PROCEDURE

Instead of a resolution, in this committee you will produce a treaty between all of you, one for each crisis. This treaty will only include operative clauses, which must be accepted by the majority of the group, being debated and voted by all delegates. During the debate some crisis will come up and you must try to face them the way your country did on past times. Then, you will create clauses containing proposes that will be discussed and voted. If they pass, they became part of the final treaty. After all the treaty is done, amendments are in order.

This committee is so cool that you do not need to adress other delegates in 3rd form, you need to adress them in 1st form, as if you were debating truly as the leaders of your country, always respecting eachother.
